

## About FischerJordan

FischerJordan is a cross-disciplinary consulting firm that helps Fortune 500 clients achieve uncommon clarity, gain control, and win in the marketplace. We have delivered hundreds of millions of dollars of bottom-line impact for our clients. We believe that our work should improve the lives of people and be connected to meaning beyond profit.

## Job Description: **Backend Web Developer Intern**

In this role, you will be responsible for developing and maintaining the frontend of multiple tech products, as well as collaborating with our team of developers and designers to create a seamless user experience for our clients. You will be expected to have a keen eye for detail and a passion for crafting intuitive and visually appealing interfaces.

To be successful in this role, you should have a strong understanding of Backend technologies, including experience in Django and REST APIs. You should also have experience in using multiple DB Stacks. Additionally, you should be able to work effectively in a team environment and have excellent communication skills.

At the moment we're looking to onboard candidates with the following key skills:

1. Backend Web Developer (Extensive experience with Django and building REST APIs, used multiple DB stacks, experience with AWS and infrastructure setup, docker)

## Responsibilities:

- Design, develop, and maintain software solutions
- Collaborate with business stakeholders to identify and solve problems, and automate business processes
- Use data analytics skills to draw insights and inform decision-making
- Ensure the quality and reliability of software solutions
- Participate in regular team meetings and code reviews

## Requirements:

- Strong work ethic and ability to work in US hours
- Competitive attitude and commitment to achieving results
- Fluency and extensive experience with your tech stack (DB Stack)
- Strong problem-solving and communication skills, including the ability to effectively communicate with business stakeholders
- Experience with AWS and infrastructure setups.
